

# Headset and Controllers

1. Hold the headset in front of your face and pull the ribbon over your head

2. Loosen the strap at the back of your head

3. Pull the ribbon over the curvature of the back of your head

4. Pull it tight behind your head

5. Adjust the handles at the sides until you feel comfortable

*A* and *X* for Selecting / Confirming

*B* and *Y* to Cancel / Go back

Right Joystick:  
Look around

Left Joystick:  
Move

The buttons at the back  
are used to rotate and  
scale objects. I'm  
explaining how exactly  
that works in the VR  
video.

The little round 'Oculus'-  
Button below the right  
joystick is used to  
summon the main menu  
or calibrate the headset.
